**Minneapolis / St. Paul Business Journal Names FieldSolutions
15th Fastest growing Minnesota Company on 2011 Fast 50 List**

List recognizes the Twin Cities fastest-growing independently owned, privately held companies.

Minneapolis—October 7, 2011—FieldSolutions (<http://www.fieldsolutions.com>), North America's premier independent field service technician resource provider, has been recognized by the Minneapolis / St. Paul Business Journal as the fifteenth (15th) fastest-growing company in the Twin Cities metro area. In the company's debut on the 2011 Fast 50 list, FieldSolutions was ranked number 15 with an audited revenue growth rate of 102.7 percent from 2008 through 2010.

FieldSolutions' CEO, Mac Lewis, credits the company's innovative direct-to-technician approach, best-in-class on-line service commerce engine, and the company's scalable, flexible field service operations outsourcing for the strong year-over-year growth.

"Our considerable growth is driven from a strong value proposition and quality results, along with a delivery model that allows our clients to aggressively expand the range of services they use from us, while shifting more and more of their work volumes to a contingent resources model," said Lewis. "FieldSolutions' proprietary web-enabled service management technology enables clients to expand their capabilities without making significant fixed investments—while substantially reducing their total direct cost of service operations."

Through the company's direct-to-technician service model, clients engage technicians directly—to the point of choosing a specific technician—just as though those technicians were their own direct field service resource. This unique field service outsourcing model gives control to the client, and together with

FieldSolutions' network of 27,000+ active technicians, means OEM's and technology services companies can operate cost-effectively with high-quality, large-scale service capabilities, everywhere in North America.

Companies who qualified for the 2011 Fast 50 are independently owned and privately held, headquartered in the Twin Cities metro area, experience year-over-year revenue growth for each of the past three fiscal years, and, three years earlier, netted revenue of at least \$1 million.

The Fast 50 award list was formally announced on October 6, 2011 and published in the October 7, 2011 issue of the Business Journal.

About the Minneapolis / St. Paul Business Journal

The Minneapolis / St. Paul Business Journal delivers breaking business news and useful information to more than 111,000 readers each week and provides the most comprehensive news, rankings and information about Twin Cities businesses. <http://twincities.bizjournals.com>.

About FieldSolutions, Inc.

FieldSolutions (www.fieldsolutions.com) provides field service technicians to large technology services companies throughout North America. Its combination of online self-service commerce engine and full-service resource management services allows clients a seamless variable-service model unavailable anywhere else. FieldSolutions' "direct-to-tech" network of more than 27,000 independent contractors offers comprehensive, low-cost services for global technology and service companies, including electronics manufacturers, resellers, and service providers, covering all areas of the U.S., Canada, and Mexico.
